ABOUT US

Our mission is: "To promote and fund the conservation of cheetah and other endangered species through captive breeding, research and public awareness."

The Cheetah Preservation Foundation was founded in 1988, with the principal aim of ensuring the survival of the cheetah and other endangered species. Our goal is to educate our visitors about the plight of these animals whilst raising funds for specifically nominated in-situ conservation programs such as the Madagascan Fauna Group & Vulpro. The cheetah is the world's fastest land animal and they are dangerously close to extinction. Less than 7000 of the big cats remain in the wild. Dozens of species face extinction across the world, and many more are increasingly vulnerable and threatened.
